# 1. Overview

Do you offer matching accessories for many main articles in your online store? But would you like to spare your customers the cumbersome way to each individual accessory item? Then we offer you the right solution with our app. After installing and activating the app, you can configure accessory items that are displayed directly below the shopping cart button. Here, the customer then has the option to pre-select each individual accessory item by activating a checkbox. After a click in the shopping cart, the selected accessory items are directly added to the shopping cart.

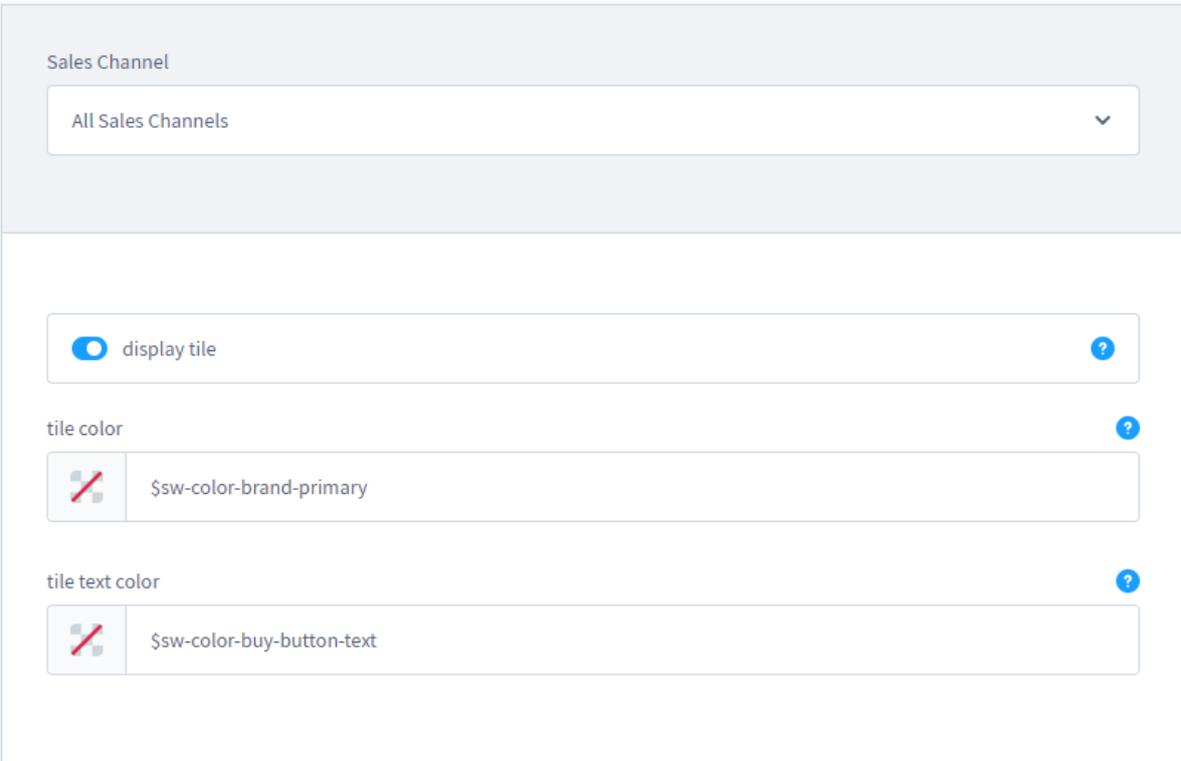

# 2. Installation

Install the app in the Shopware 6 Administration via the tab:

- |-- Administration
  - └ Extensions
    - └ My extensions

### 3. Configuration of the app

In the app configuration, you can choose whether a tile should be displayed next to the checkbox to show the customer which accessory items he has selected. You can also change the color of the tile and the font color of the displayed checkbox. By default, the option is disabled. By default, the tile color is the same as the primary color of the store and the text color is the same as the text color of the "Add to Cart" button.

The screenshot displays a configuration panel with the following elements:

- Sales Channel:** A dropdown menu currently set to "All Sales Channels".
- display tile:** A toggle switch that is turned on (indicated by a blue circle).
- tile color:** A color selection field with a red 'X' icon and a question mark, currently set to the theme variable `$sw-color-brand-primary`.
- tile text color:** A color selection field with a red 'X' icon and a question mark, currently set to the theme variable `$sw-color-buy-button-text`.

After configuring the tile or font color, the theme must be compiled for the changes to take effect.

## 4. Using the App

After a successful installation you will find a new tab "Accessories" on the article detail view. Here you can configure the accessories for an article. The configuration is identical to the Cross Sellings. So you can create several accessories and assign them manually to articles or a product group.

The screenshot shows the configuration interface for an accessory. At the top, the article name 'Heavy Duty Rubber Fire Writer' is displayed, along with language and action buttons. Below this is a navigation bar with tabs for 'General', 'Advanced pricing', 'Property assignment', 'Variants', 'Cross Selling', and 'Accessory'. The 'Accessory' tab is active. The main content area is titled 'pen cartridges' and contains a form with the following fields:

- Name \***: A text input field containing 'pen cartridges'.
- Active**: A toggle switch that is currently turned on.
- Type**: A dropdown menu set to 'Dynamic product group'.
- Position**: A text input field containing '1'.
- Product group**: A dropdown menu set to 'pen cartridges'.
- Sorting**: A dropdown menu set to 'Name'.
- Maximum amount of products**: A text input field containing '24'.

At the bottom right of the form is a link 'Open preview →'. Below the form is a button 'Add new Accessory'.

If accessories are assigned to an article, they will be displayed on the article detail page under the shopping cart button. The customer has the possibility to select accessories, which will be added to the shopping cart by clicking on the shopping cart button.

## 5. Support

You have questions or wish to customize this app to your needs?

Please use the **Shopware-App-Support Function**.

You need support in implementing your shopware requirements. Please use our contact form under <https://rhiem-intermedia.de/kontakt/>

Or write us an e-mail: [info@rhiem-intermedia.de](mailto:info@rhiem-intermedia.de)

## 6. Lizenz Agreement

Please note our license agreement: <https://rhiem.com/license-agreement.pdf>

By using our app you confirm that you have read the license agreement and agree with it.
