1. Overview

This app allows you to restrict your Shopware shop to certain customer groups. All visitors of the shop will see the complete shop, but only the customer groups you configured can add items to the shopping cart and place an order.

All other visitors will get a corresponding note in the listing and on the item detail page and will not have a shopping cart.

So you can present your article to a wide audience and still make sure that only certain customer groups can buy it.

2. Installation

Install the app in the Shopware 6 Administration via the tab:

- |-- Administration
 - └ Settings
 - └ System
 - └ Apps

3. Configuration of the app

In the app configuration you select the customer groups that are allowed to shop around the respective shop in the area "Customer groups". A multi-selection is possible.

Under "General" you can decide whether product prices should be displayed to excluded customer groups.

In the area "Design" you can choose in which colour the hint should be displayed. The primary colour of the shop is pre-selected by default.

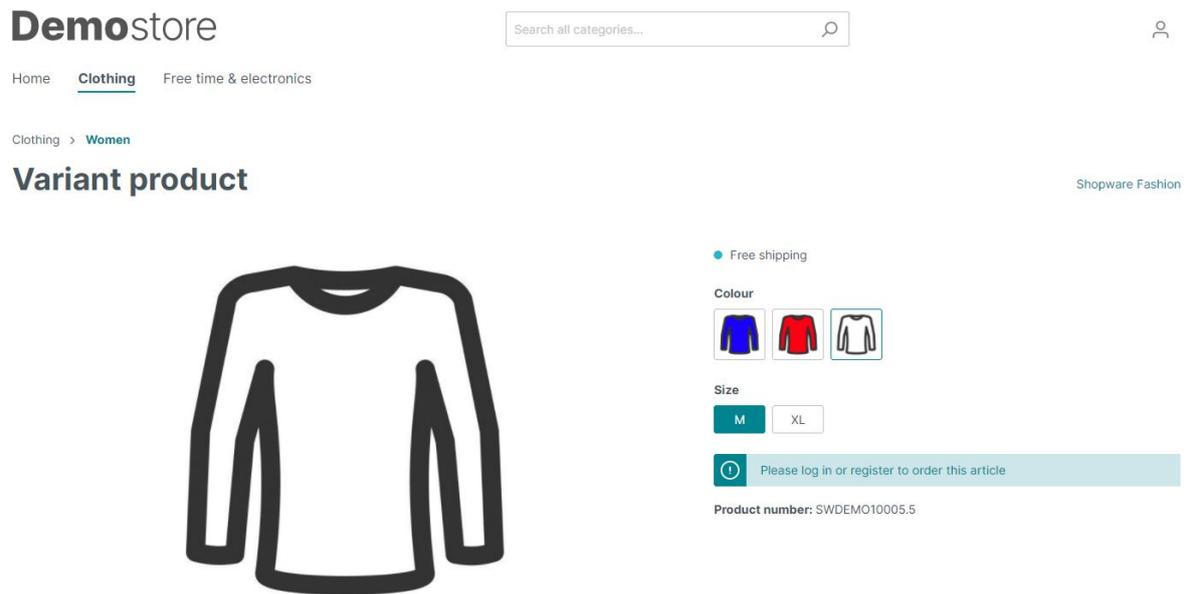

The screenshot shows the configuration interface for 'RhiemB2BSW6'. At the top right, there are 'Cancel' and 'Save' buttons. The interface is divided into four sections:

- Sales Channel:** A dropdown menu with 'All Sales Channels' selected.
- Customer groups:** A dropdown menu with 'Standard customer group' selected. A blue question mark icon is visible to the right.
- General:** A toggle switch for 'Hide prices for excluded groups', which is currently turned off.
- Design:** A dropdown menu for 'Colour' with 'Primary colour' selected. A blue question mark icon is visible to the right.

App configuration

After a click on "Save" the settings in the app are accepted.

4. Display in the storefront

Display in the storefront

After the app is installed and configured, the display in the storefront changes. Released customer groups get the familiar appearance of the shop.

Customer groups, who are not allowed to shop around the shop, will get a hint instead of the "Add to cart" button, which asks you to login or register.

You can change the hint text at any time. Simply edit the text module "rhiem-b2b.notLoggedIn". The variables "%login%" and "%register%" contain the respective link to the login and register page.

5. Support

You have questions or wish to customize this app to your needs?

Please use the **Shopware-App-Support Function**.

You need support in implementing your shopware requirements. Please use our contact form under **<https://rhiem-intermedia.de/kontakt/>**

Write us an e-mail: **info@rhiem-intermedia.de**

or call us at: **+49 (0) 28 55 / 97 00-0**

6. License Agreement

Please note our license agreement: **<https://rhiem.com/license-agreement.pdf>**

By using our app you confirm that you have read the license agreement and agree with it.
