1 Overview

The “customer group-dependent price display” plugin gives you the option of hiding prices for certain manufacturers in the frontend, depending on the customer group. The articles can still be viewed, but not placed in the shopping basket.

1.1 Installing the plugin

Install the plugin using the Plugin Manager (details on the Plugin Manager can be found in the Shopware Wiki at <https://docs.shopware.com/en/shopware-5-en/plugins/pluginlicense-manager>)

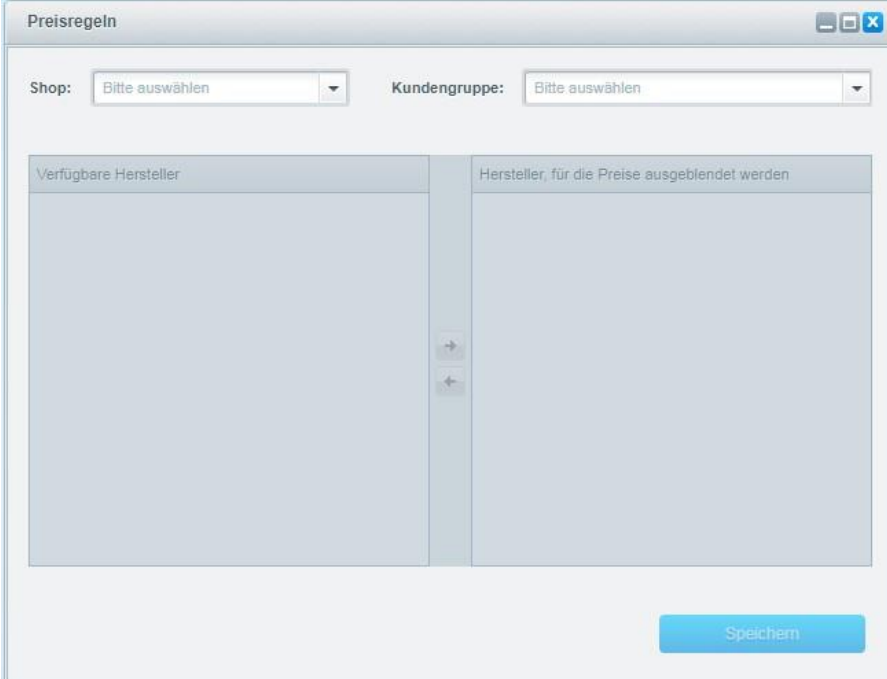

After the successful installation the configuration window of the plugin appears. Here you can define how the price will be displayed for customers who are not logged in.

Wert	Erläuterung
Apply rules as well	Price rules explained in point 3.1 also apply to customers who are not logged in.
Always hide prices	Prices are never displayed for customers who are not logged in.
Always show prices	Prices are always displayed for customers who are not logged in.

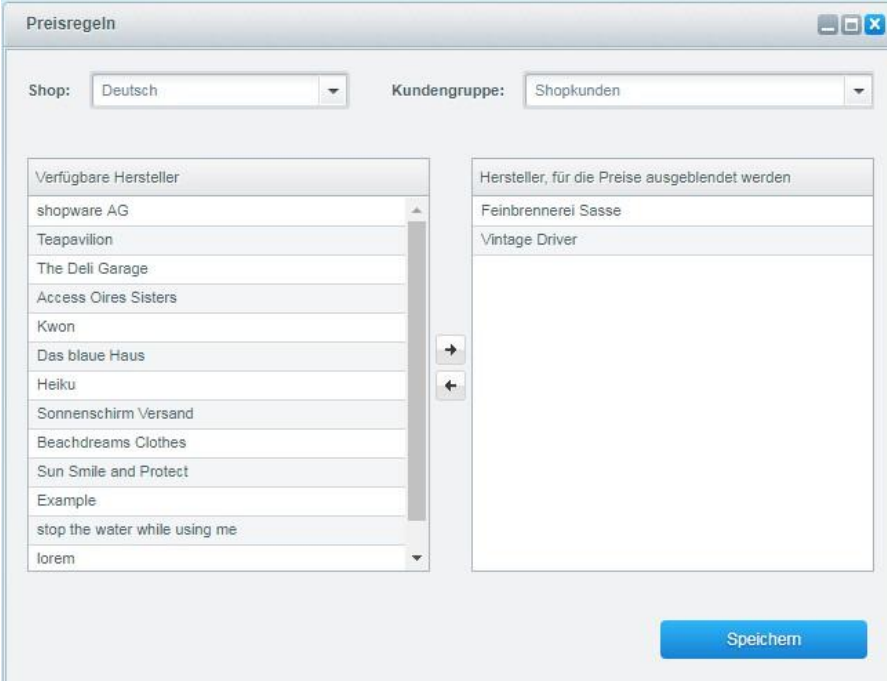

2 Using the plugin

2.1 Create price rules

To manage price rules, open the settings menu of the plugin in the backend via the menu item Marketing – Price rules.

To hide prices from certain manufacturers, you must first select a shop and a customer group. In the next step, you can use Drag & Drop or the arrow keys to select manufacturers for whom you want to hide prices in the frontend.

Leider können Sie den Preis des Artikels nicht einsehen
